

# How to install & activate your JET eSIM | Samsung

Install before your trip and activate only at your destination

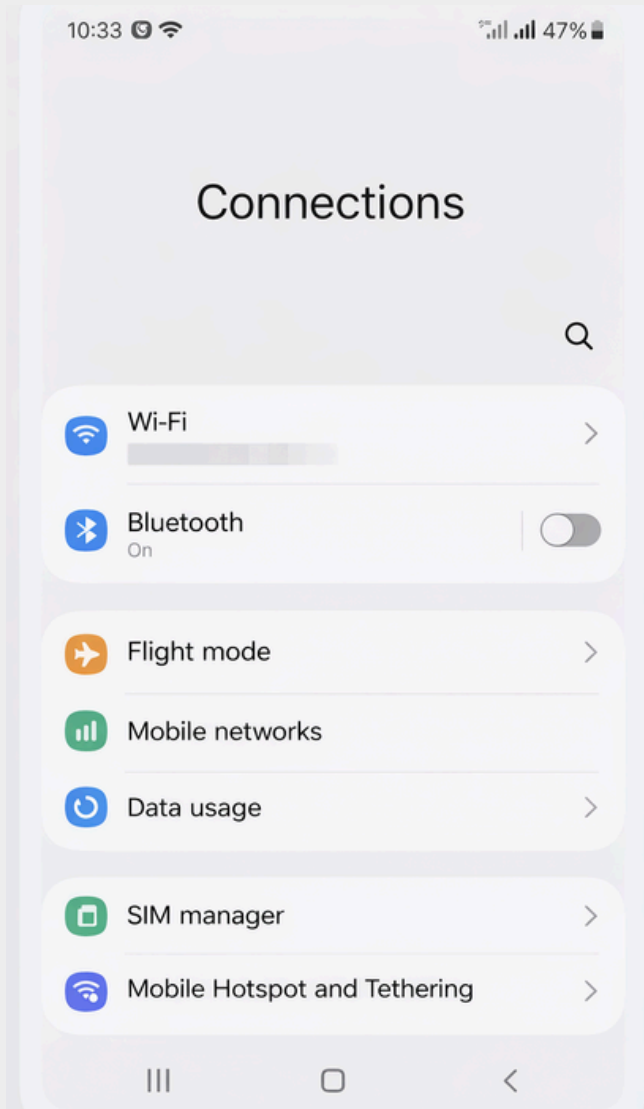

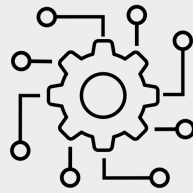

# 1.1 QR Code installation

You can install your eSIM by scanning the QR code sent to you via email. To do this, have the QR code printed or displayed on another device for scanning.

**We recommend installing the eSIM before your trip.**

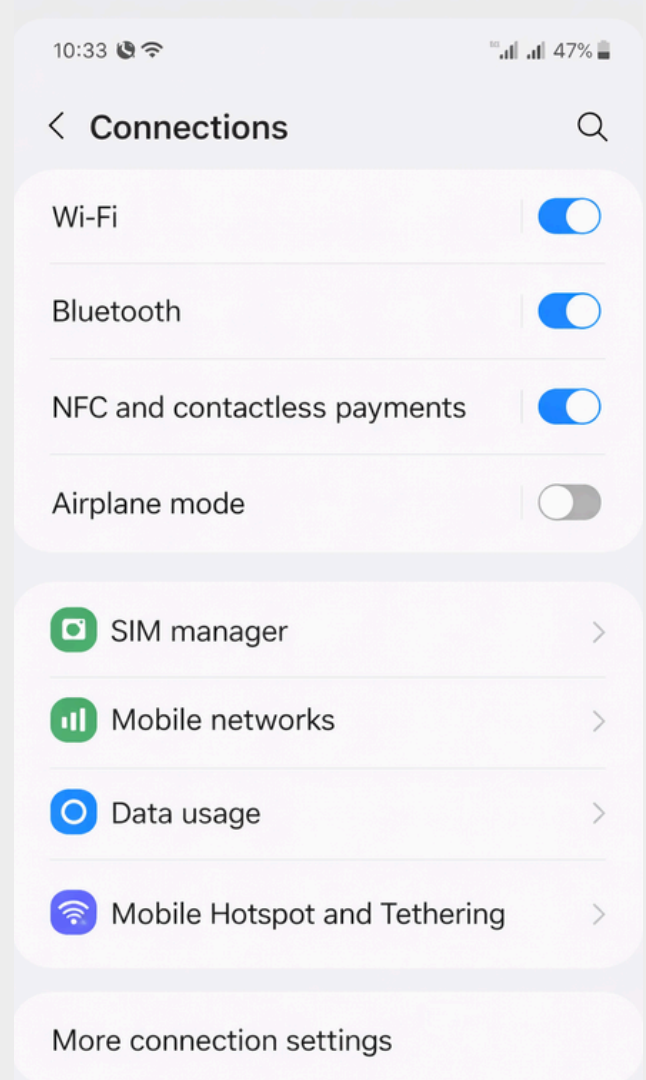

1.Go to Settings

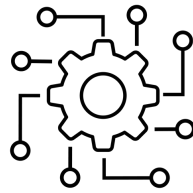

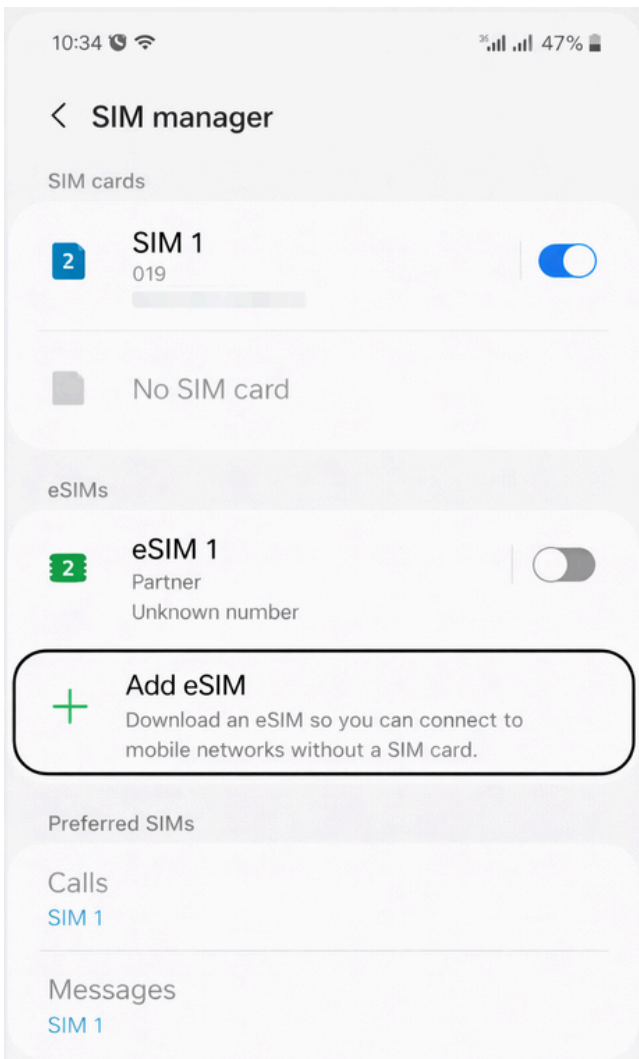

2. Go to Connections

3. Tap on SIM Manager

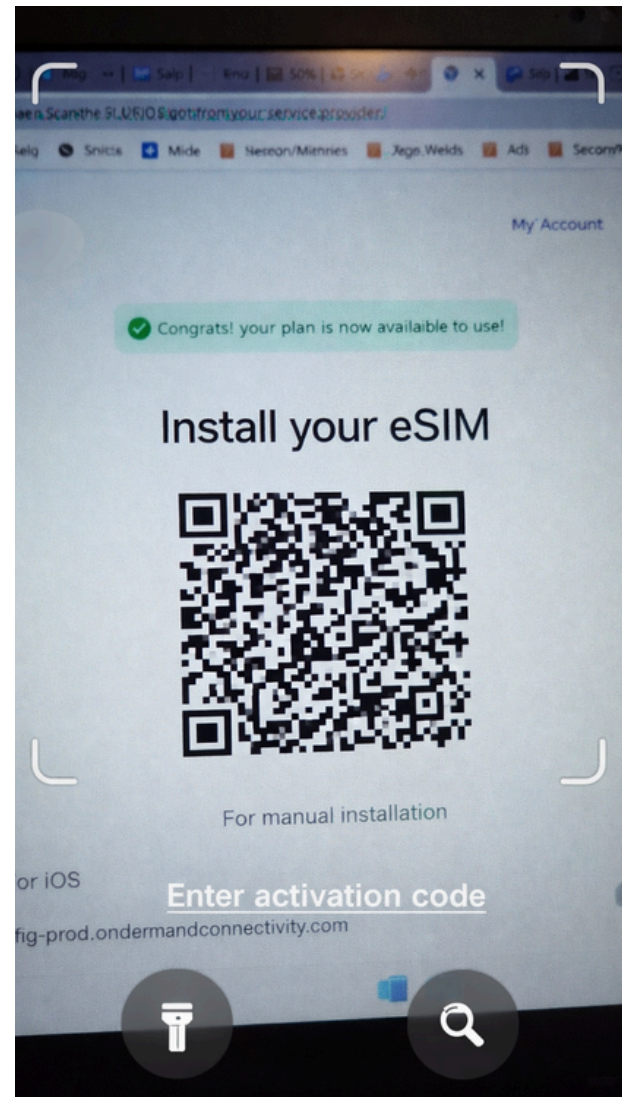

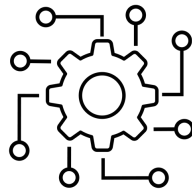

# JET eSIM

4. Add your eSIM

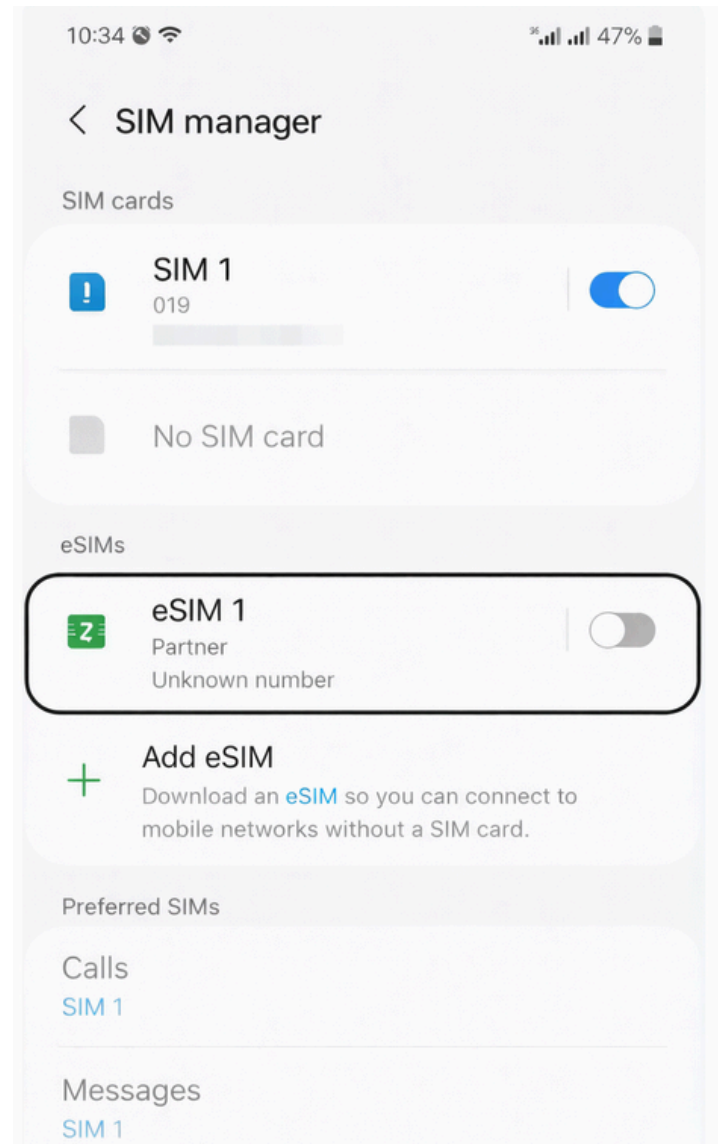

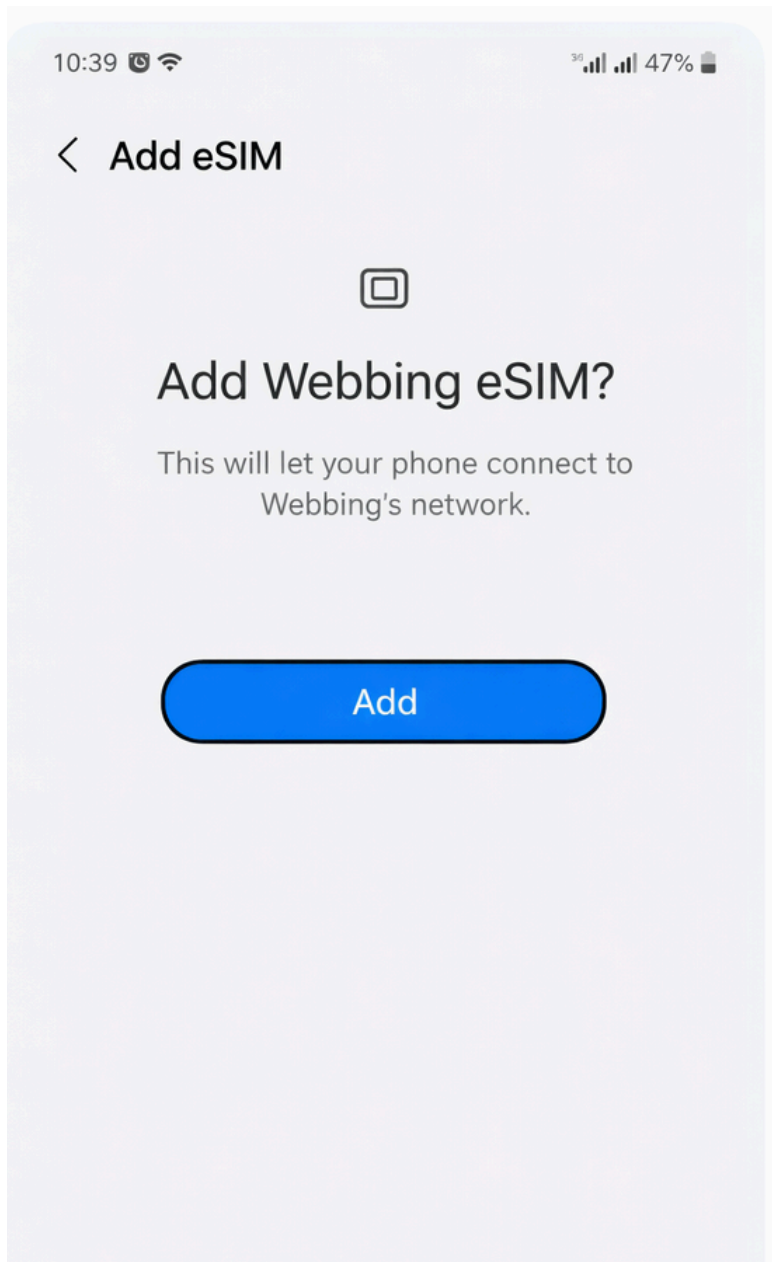

5. Select QR Installation Option & Scan the QR code we sent you

## JET eSIM

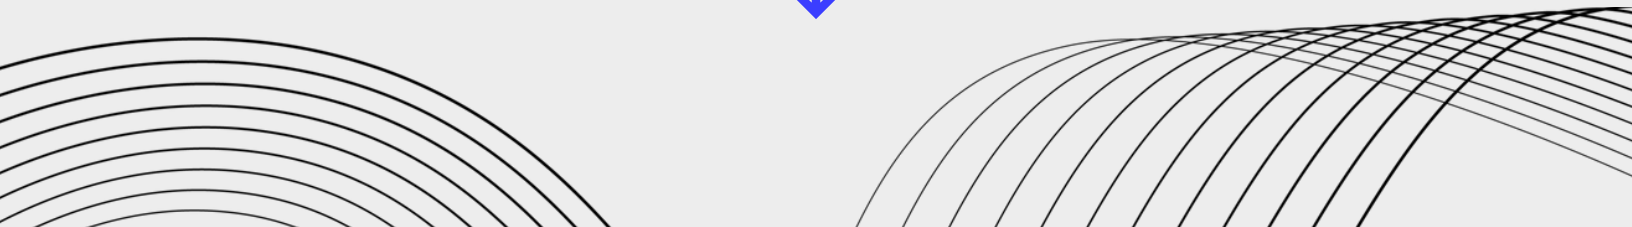

6. Add your mobile plan

7. Label/Rename your new data plan e.g. "Strong eSIM"

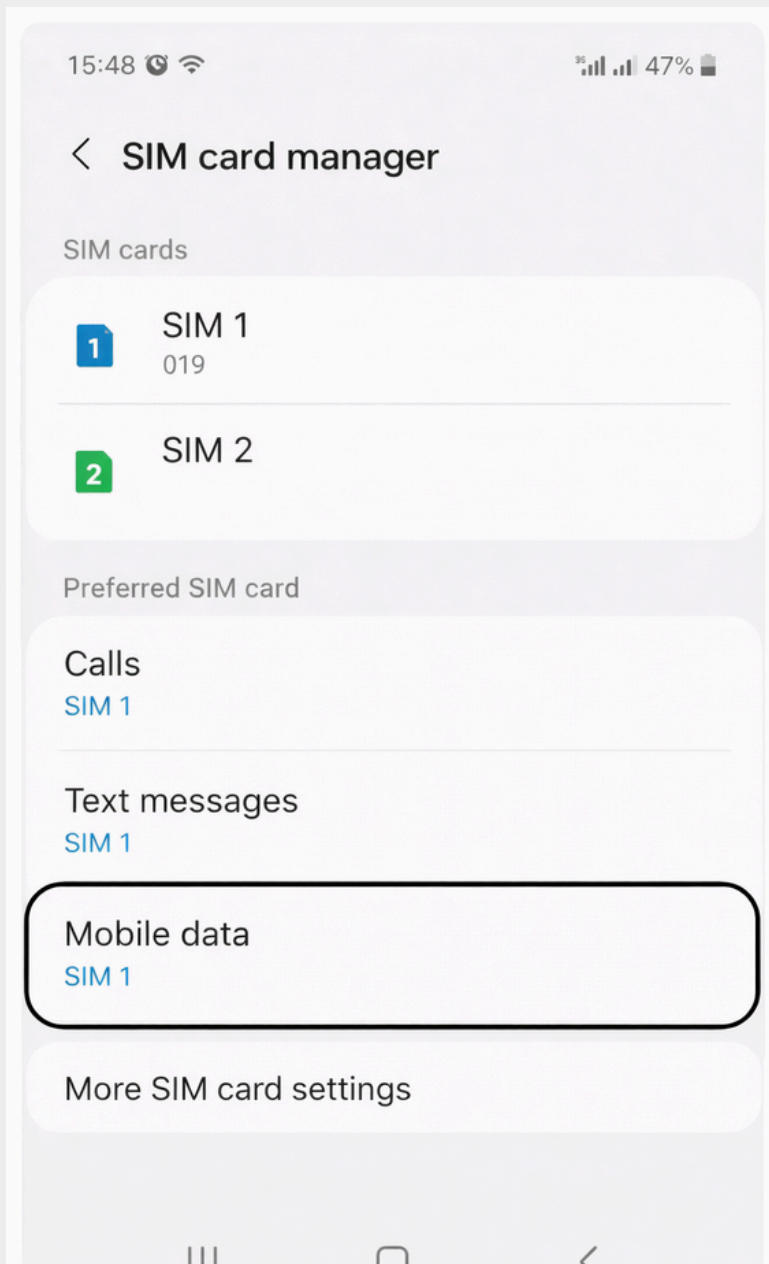

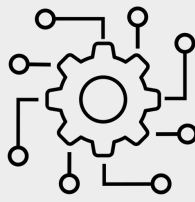

## 2.1 eSIM Activation

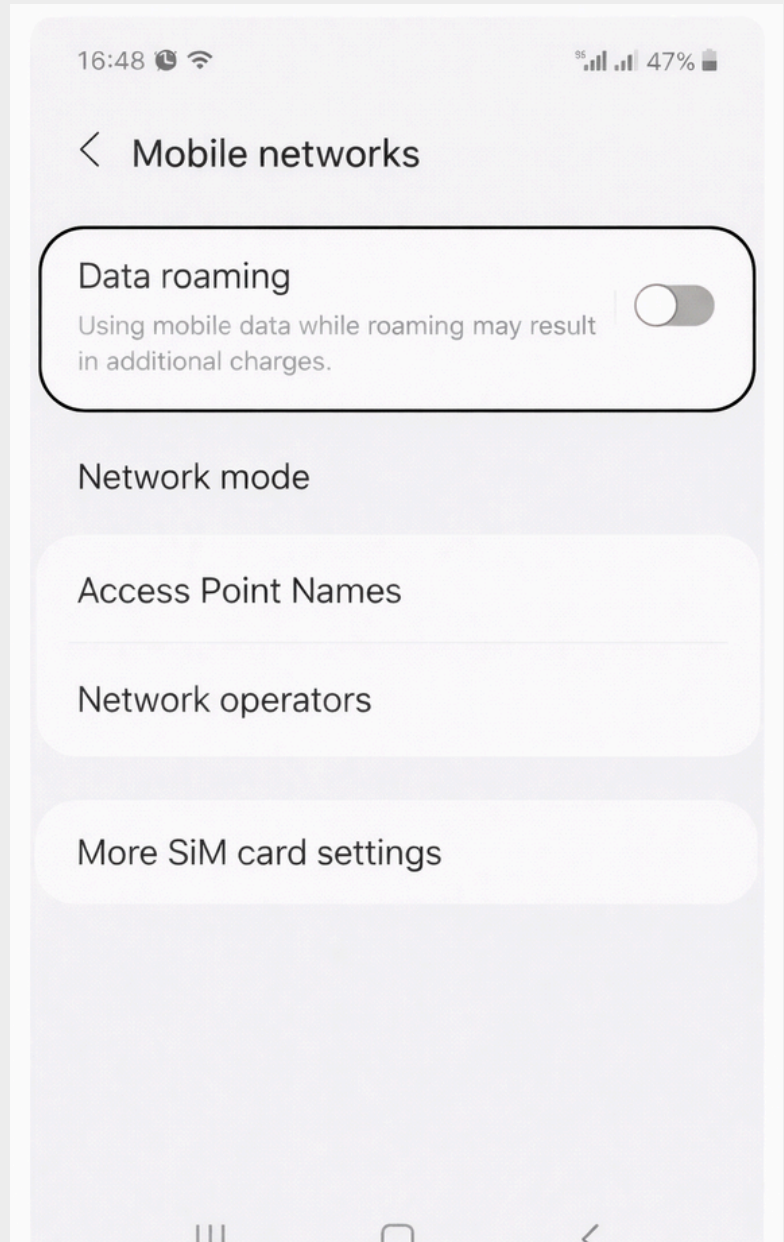

Activate only at your destination.

2.2 Click on Mobile Data  
and select your new Strong  
eSIM

2.3 Enter "Mobile Networks" and  
turn on "Data Roaming"

# FAQ ↘

Can I install the eSIM without an internet connection?

No, an internet connection (via Wi-Fi or cellular data) is required to install the eSIM and complete the necessary configuration on your phone. Therefore, we recommend installing it before you reach your destination.

Can I activate the eSIM without an internet connection?

Yes, activating the eSIM does not require an internet connection. Simply enable roaming or data roaming in your phone's settings to activate the plan. We suggest activating it upon arrival to avoid using your data plan prematurely.

Stay connected, strong.
